EVM3620A-QV-00A
24V/2A Module Converter with Integrated Inductor Evaluation Board

The Future of Analog IC Technology

DESCRIPTION

The EVM3620A-QV-00A is an evaluation board for MPM3620A, a synchronous rectified, step-down module converter with built-in power MOSFETs, inductor and two capacitors.

The evaluation board can deliver a 2A continuous output current with excellent load and line regulation over a wide input supply range.

Current-mode operation provides fast transient response and eases loop stabilization.

Full protection features include over-current protection and thermal shut down.

The MPM3620A is available in a space-saving QFN20 (3mm x5mmx1.6mm) package.

QUICK START GUIDE

1. Connect the positive and negative terminals of the load to the V_{OUT} and GND pins, respectively.

2. Preset the power supply output between 4.5V and 24V, and then turn off the power supply.

3. Connect the positive and negative terminals of the power supply output to the V_{IN} and GND pins, respectively.

4. Turn the power supply on. The board will automatically start up.

5. To use the Enable function, apply a digital input to the EN pin. Drive EN higher than 1.4V to turn on the converter, or less than 1.25V to turn it off.
